## 2-4. Name Cases.

The image shows a screenshot of a VS Code editor window. The top pane displays a Python script named `name_cases.py` with the following code:

```
1 name = "code cobra"
2 print(name.lower())
3 print(name.upper())
4 print(name.title())
5
```

The bottom pane shows the **TERMINAL** output, which includes the command used to run the script and its output:

```
